MODULAR SIGN SYSTEMS

YOUR GLOBAL PARTNER IN SIGNAGE

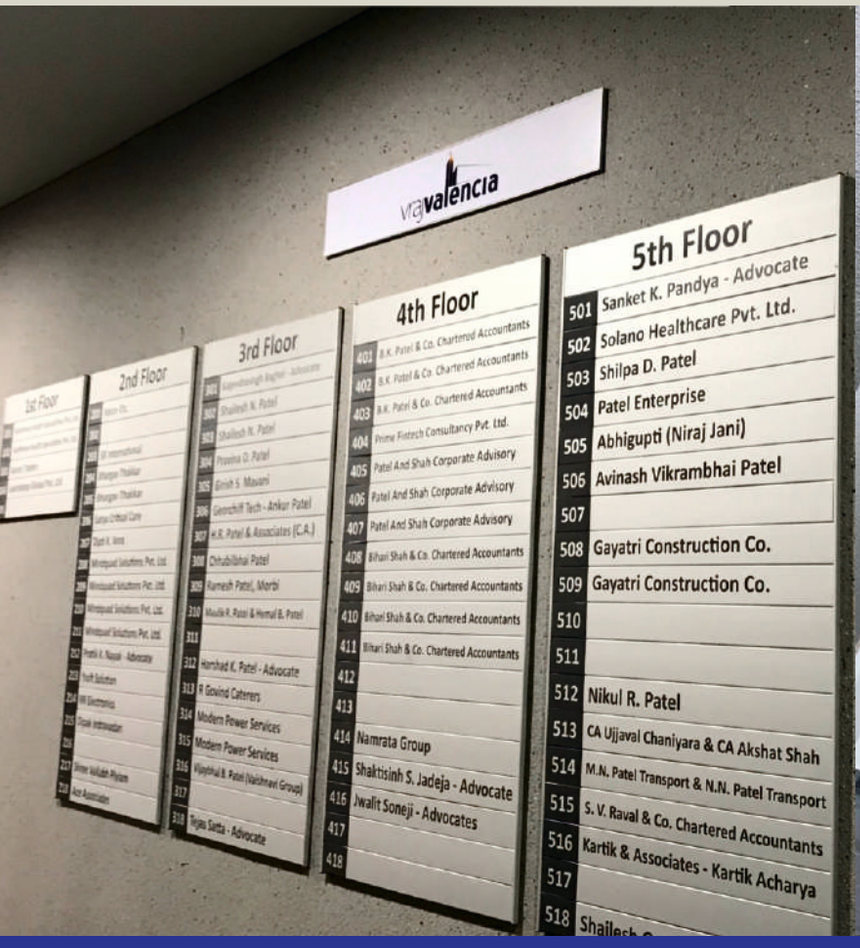

Cosign was established in 1993. Over the last 32 years it has become the unsurpassed reference with regard to architectural signage.

No matter what type of signs you need, for indoor or outdoor use, flexible or modular, with or without LED technology, if desired with fabric, advertising pillars or spacers, Cosign is the right address.

Cosign is a global player with production facilities and distribution centres in Belgium (headquarter), India, Mexico and Brazil

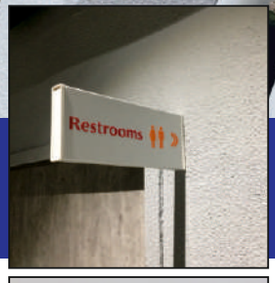

Our extensive range of products is unique. We are able to deliver quickly due to our large supply of stock, 32 years of experience, well-organized logistical transactions and perfect service. Cosign is a reliable partner that you can trust.

MODULE PLUS INDOOR

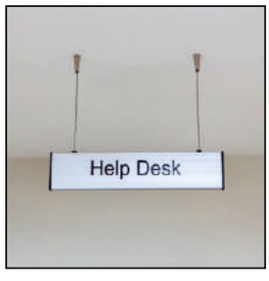

www.cosign.in/moduleplusindoor

A CLASSIC PRODUCT THAT CONTINUES TO DO THE JOB PERFECTLY!

With the Module Plus Indoor, Cosign developed a modular sign system at the beginning of the 1990s that started a new trend within architectural signage and served as an inspiration for many people working in the same industry.

The Module Plus Indoor consists of a series of flat aluminium profiles in different widths that has a15.5 mm and 31 mm module as the basic profile. The profile can be "clicked" into place in an easy manner on plastic end caps or clips to create door signs, pictogram, directories, etc. Single-sided signs for wall mounting and double-sided systems for hanging or flag mounting are possible.

The Module Plus Indoor platform does not just offer the sign maker a simple, versatile and flexible standard solution, it also offers space to the creative sign maker to place his or her own emphasis and to develop customised products.

STRATO

www.cosign.in/strato

STRATO is a flexible and contemporary sign system consisting of series of soft curved profile with a straight edge.

A paper inlay (in the most common DIN formats) can be inserted in the profile behind a non reflecting cover. Inserts in plastic or metal are of course also possible as well as direct printing on the profiles.

The user can choose between plastic and aluminium endcaps for the finish. Recently, a few profiles and end caps are added to the range that ensure that 400 mm, 500 mm and 600 mm wide directories can be produced.

I-SIGN FIX

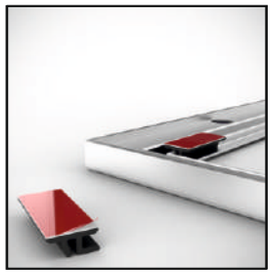

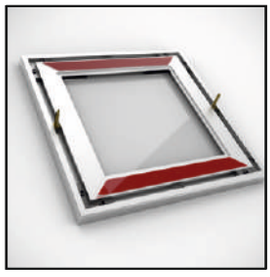

www.cosign.in/isignfix

The sleek design of the I-sign range is extended to the I-Sign Fix; observe the elegant frame with invisible fixing.

Sheets of only 2 or 3 mm thick are mounted in the frame with a small, innovative clip. The sheets can be made from various materials: PVC, ACP, acrylic, aluminium, engraving materials, etc. This results in a high degree of personalisation.

I-SIGN DISPLAY

www.cosign.in/isigndisplay

The single-sided I-Sign Display profiles make it possible to make framed large panels, digital prints and art virtually without an edge and without visible fixing. This makes them very suitable for use in museums, galleries and interior decoration.

The double-sided slim 24mm profile is a perfect option for making non lit suspended & projected signs.

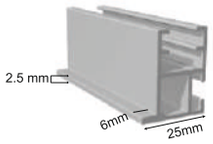

The double-sided 50mm profile is a perfect option for making thin light boxes and illuminated or non-illuminated indoor pillars.

The double-sided 100 mm profile is designed to build totems up to 4 m & lit light boxes.

Double-sided tape, magnetic tape or the 3M dual Lock reclosable fastener can be used to affix the panels.

I-SIGN ECO

www.cosign.be/i-sign-eco

I-Sign Eco is the newest member of the I-Sign family. I-Sign Eco maintains the same sleek design with the thin edge which became so typical for the entire I-Sign range.

It is possible to create single-sided, wall mounting or double-sided suspended or flag mounting signs.

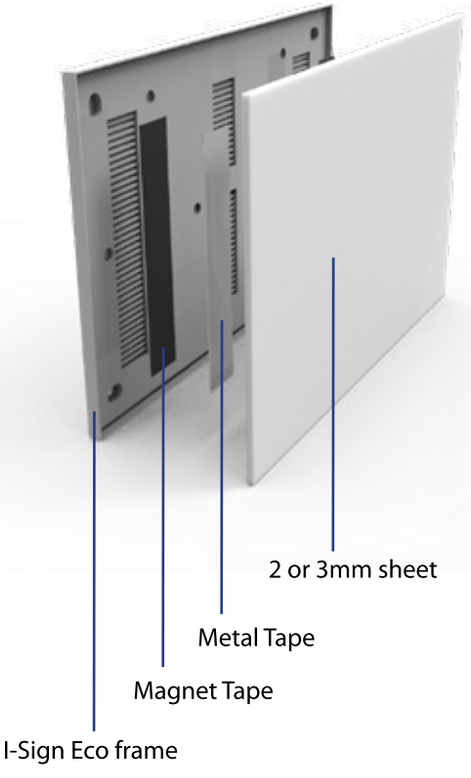

CUSTOM MADE COSIGN

READY MADE COSIGN

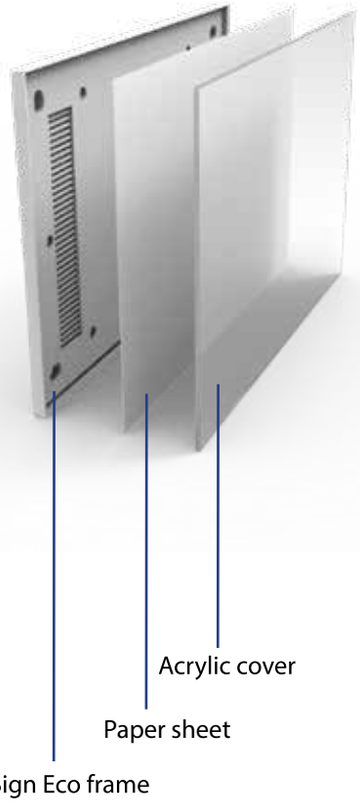

One Frame, Two Functions

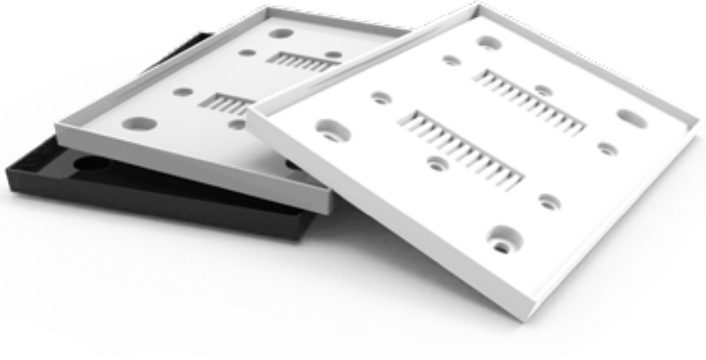

The user can choose between a flexible version with a paper inlay behind a non-reflecting acrylic cover, or a more fixed version with 2 or 3mm thick sheets in different materials like PVC, ACM, acrylic or aluminium which allow for a highly customized solution.

I-SIGN ECO FIX

I-SIGN ECO FLEX

The frames, which are available in sizes DINA6, DINA5, DINA4, DINA3, 150x150mm and 150x300mm, are injection molded in abs plastic and are available in different colors.

Standard colors are aluminium grey, white and black.

LIGHT BOX

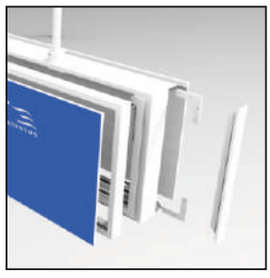

www.cosign.in/lightbox

Cosign developed an elegant indoor light box with a depth of only 75mm (single-sided) or 100mm (double-sided).

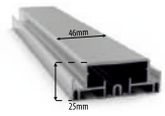

The hinging frame on top makes maintenance and a quick change of the acrylic panels and/or graphics extremely easy.

The hinging frame comes in 2 versions. One has the typical I-Sign look with the thin edge. The other one has an edge of 12.5mm which allows for the acrylic panels to be fully illuminated.

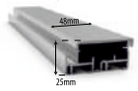

The perfect light box for airports, metro station, garages, parking lots etc.

FABRIC FRAME

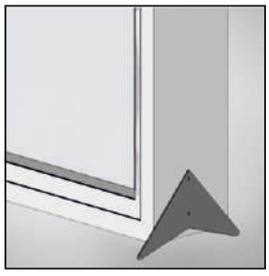

www.cosign.in/fabricframe

COSIGN FABRIC FRAMES: INFINITE POSSIBILITIES

Fabric frames are the solution for the fast and easy exchange of printed textile fabric. The image is printed on a textile fabric and a silicon beading is added around it. This is simply pressed into the profile that ensues that the slightly stretchable fabric can be stretched perfectly.

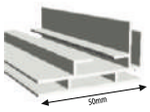

The convenience of use of our aluminium profile in combination with innovative accessories and high-quality textile fabrics that can be printed up to 5 m wide seamlessly means that our fabric frames are perfectly suitable for dressing and setting up shops, showrooms, office and fair stands. Regardless of whether you want a wall frame or a standalone or hanging frame, you will find the right solution with our single-sided and double-sided fabric profiles.

ART FRAME

www.cosign.in/artframes

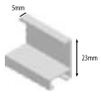

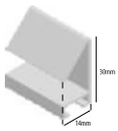

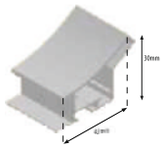

The Cosign art frames are a popular solution for installation of painted or printed canvas. Made of aluminium these frames are light weight. Metallic finishes in different shapes compliment all kinds of architectural environments.

The canvas can be easily replaced. There is enough space to include a glass cover to protect the canvas. Perfectly suitable for shops, showrooms, offices, hotels, malls and even homes.

LED FRAMES

www.cosign.in/ledframes

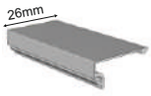

LED Thinlites are elegant, poster frames with integrated LED Light Sheets. The thin LED frames have hidden leaf springs.

LED Thinlites can be supplied in single-sided version in various standard sizes. Custom-made versions (with regard to dimensions, colours, indoor/ outdoor use, with or without a switch, etc.) can also be supplied. Cosign can also supply the aluminium profile and accessaries to assemble your LED Thinlites yourself.

Slide in frames are slim lit frames in which graphic can be easily changed by sliding it.

MODULE PLUS OUTDOOR

www.cosign.in/moduleplusoutdoor

STYLISH MODULAR OUTDOOR SIGNS

With Module Plus Outdoor, Cosign has developed a modular system for outdoor signs that is recommended by architects and designers worldwide and that sign makers like to use because of its versatility and convenience and the option of making unique custom-made signs.

Module Plus Outdoor offers the perfect solution everywhere where a building or location needs to be indicated, a message must be presented or people must be shown the correct place regardless of whether this is for an industrial estate, a company or office building, a hospital, a school, a shopping centre or a car park. Appropriate outdoor signs will also contribute towards strengthening a company's corporate identity.

TOTEM PYLON

www.cosign.in/totempylon

Advertising pillars are omnipresent on today's street scene. A carefully designed advertising pillar makes it easier to find locations and contributes to the brand awareness and corporate identity of a company.

Everyone is familiar with the 'classic' totem profile, which are used to make illuminated or non-illuminated elegant, curved or elliptical advertising pillars. Depending on the application, location and desired size, the sign maker can choose our totem pylon 50 mm or totem pylon 80 mm for smaller totems (up to 3 metres) or our totem pylon 137 mm and the more recent H-profile or larger totems (up to 6 metres).

Depending on the chosen profile and internal structure, the sign maker can make small, elegant indoor totems as well as large, sturdy totems of up to 6 metres high.

MODULAR TOTEM

www.cosign.in/modulartotem

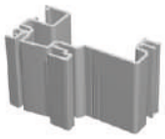

Modular Totem is an extremely intelligent profile system that consists of one basic profile and two decorative cover profiles (elliptical and rounded) that are mounted on a frame.

The system allows you to determine the depth (10, 15 or 20 cm), structure material (aluminium or steel), size and wall thickness of the interior structure of the totem. This makes it possible to construct strong totems of up to 6 metres high.

The profiles and panels are attached with hidden screws. The totems are easy to maintain and update because the panels can be lifted out and inserted effortlessly.
